

IMPORTS — FOR MILLS IN TÜRKİYE

EN 643:2014 grade definitions apply. This specification covers imports made under the Turkish buyer mill's waste importer registration and environmental permit; mill-specific additional terms are stated in the offer.

2. Bales and loading

- Bale weight 1.0–1.3 t; wire-tied (minimum 4 wires); bale dimensions suitable for container loading
- 40' HC container: 23–25 t; loading photos (empty, half, full, doors closed, seal) sent with the shipment
- Bale list: bale count, gross/net weight, container and seal number

3. Documents and regulation

- Commercial invoice, packing list, bill of lading
- Annex VII — Regulation (EU) 2024/1157 for EU-origin shipments, retained Regulation (EC) 1013/2006 for UK-origin shipments; OECD Decision; Basel B3020 — with the buyer mill's waste importer registration details
- Turkish side: waste importer registration certificate (Atık İthalatçı Kayıt Belgesi) and environmental permit and licence (Çevre İzin ve Lisans Belgesi) of the buyer mill; import quota tied to licensed capacity
- HS: 4707.10 (OCC / kraft), 4707.30 (ONP), 4707.90.90 (sorted mixed); unsorted mixed paper (4707.90.10) cannot be imported into Türkiye
- Pre-shipment inspection report — where requested (third-party survey company)
- Radioactivity and moisture are measured on arrival; moisture governs weight adjustment

4. Non-conformity

Where moisture or contamination exceeds the limits, the buyer notifies within 14 days with photographs and weighbridge tickets; weight adjustment or price allowance is applied by agreement. Rejection per bale is reserved.
